# Small Instrumentation Modules

SIM970 — 5½-digit quad digital voltmeter

- True 5½-digit performance
- Four isolated channels
- 3 decade autoranging to  $\pm 19.9999$  V
- 10 M $\Omega$  input impedance
- Trigger input for data synchronization
- Unique continuous auto-calibration
- 90 dB power line frequency rejection

## SIM970 Quad Digital Voltmeter

The SIM970 Quad Digital Voltmeter is designed to make precision DC voltage measurements with excellent long-term accuracy.

For applications in which many voltages must be monitored, up to 16 DVM channels can be put into one SIM900 mainframe. Four voltage ranges from  $\pm 199.999$  mV to  $\pm 19.9999$  V can be autoranged or manually selected. An external trigger input allows synchronization of voltage readings on all four channels for critical applications requiring coincidental readings. A BUSY output gives a TTL (logic high) signal when readings are being taken.

Auto-calibration is performed with every reading by sequentially measuring not only the input voltage, but also the ground and the full-scale voltages against a calibrated internal reference. This auto-calibration routine virtually eliminates offsets and scale errors, and ensures smooth range-to-range transitions.

The bright front-panel LED display shows updated readings three times per second. Computer access through the SIM900 mainframe (RS-232 or GPIB) permits data logging with 24 bits of resolution. All channels are isolated from ground and each other. The SIM970 uses isolated BNC connectors for inputs so coaxial cables can be used for reduced noise pickup.

**Full-scale DC voltage ranges**

| Range | Voltage     | Resolution | Noise, counts rms <sup>[1][2]</sup> |
|-------|-------------|------------|-------------------------------------|
| 1     | ±19,9999 V  | 100 μV     | 1.5                                 |
| 2     | ±1.99999 V  | 10 μV      | 0.8                                 |
| 3     | ±999.99 mV  | 10 μV      | 0.8                                 |
| 4     | ±199.999 mV | 1 μV       | 1.0                                 |

**Measurement accuracy, ±(% of reading + counts) <sup>[3]</sup>**

| Range            | 24 hour, (23±1) °C | 90 day, (23±5) °C (typ.) | 1 year, (23±5) °C (typ.) |
|------------------|--------------------|--------------------------|--------------------------|

| Warranty                                 | One year parts and labor on defects in materials and workmanship                         |

SIM970 rear panel

**NOTES**

- [1] One count is a unit change in the least-significant-digit. Greater resolution is available through the remote interface.
- [2] Measured over 360 consecutive readings
- [3] Inside SIM900 mainframe following a two hour warm-up, autozero ON
- [4] Scale calibration ON
- [5] Within 10 minutes and ±0.5 °C, within ±10 % of the initial value, fixed range, input between 10 % and 100 % of full scale
- [6] Input bias current is <1 pA at 23 °C
- [7] Internal triggering, autozero ON. Rate is double for autozero OFF.

**Ordering Information**

SIM970 4-channel digital voltmeter

# Small Instrumentation Modules

SIM900 Series — Product overview

## SIM900 Series

- SIM mainframe
- Analog PID controller
- AC Resistance bridge
- Bessel/Butterworth filters
- Preamplifiers
- Temperature monitors
- Analog signal conditioning
- Isolated voltage source
- Octal 4-wire multiplexer
- Quad digital voltmeter
- Rubidium frequency standard

SIM — Small Instrumentation Modules — is a compact test and measurement platform for a wide range of applications. Unlike other modular systems, SIM offers complete front-panel as well as remote operation, allowing you to choose between manual and computer control. Up to eight instruments share the same mainframe which provides power, clock synchronization, communications, and module status. For additional versatility, you can cascade mainframes or other RS-232 instruments, and even operate modules outside the mainframe.

With SIM, you configure precision measurement and control systems, achieving the exact functionality you need while avoiding the cost of unnecessary features.
